

## LOGIXML AWARDED CONTRACT BY COMMONWEALTH OF VIRGINIA TO PROVIDE BUSINESS INTELLIGENCE TOOLS

**McLean, VA (August 27, 2008)** - LogiXML, Inc., one of the fastest-growing providers of interactive, Web-based Business Intelligence (BI) solutions, announced today that it has been awarded a contract by the Virginia Information Technologies Agency (VITA). This contract allows agencies and public bodies within the Commonwealth of Virginia (and other public bodies outside of it) to purchase licenses, support and services for LogiXML's signature enterprise-grade business intelligence solutions. Contract award was based on a thorough evaluation of responses to an RFP issued by VITA's Supply Chain Management directorate.

The contract, which includes five optional one-year extensions at the end of the initial 5-year period, provides the Commonwealth with the complete line of LogiXML products and support services, including an enterprise-wide license option available to Virginia's executive branch agencies. LogiXML is a certified small business with headquarters in McLean, Va.

LogiXML's full suite of user-friendly BI solutions operates on a unified Web-based platform to meet a wide range of data reporting, analysis and dashboards needs, and deliver outstanding efficiency and access to data in a visual and actionable format. LogiXML's Web-based ad hoc reporting allows users to configure and run customized reports on demand, without the need for IT involvement. With its managed corporate reporting, more technical report developers can use LogiXML to build and deliver Web-based reports to users and groups across the organization in a standardized and streamlined protocol.

The Virginia Enterprise Applications Program (VEAP) is coordinating with a number of state agency representatives to establish a Business Intelligence Competency Center (BICC) to assist with disseminating information about and develop and deliver training in the LogiXML tools. This BICC will be available to assist agencies when they transition to use these tools.

"We are very excited to have this opportunity to work with the Commonwealth to provide this vital technology to help state agencies extract the most value from their data," said Arman Eshraghi, CEO and founder of LogiXML. "Virginia is one of the only states to implement technology standards. This initiative is likely to result in a strong best-practices playbook that other states could employ in establishing their own BI environment."

As part of the contract, LogiXML, Inc. has teamed with Science Applications International Corporation (SAIC) to supply extended support services as needed to Commonwealth agencies and local government organizations desiring support. SAIC, a leading provider of scientific, engineering, systems integration and technical services and solutions to all

branches of the U.S. military, agencies of the Department of Defense, the intelligence community, the U.S. Department of Homeland Security and other U.S. Government civil agencies as well as to customers in selected commercial markets.

**About LogiXML, Inc. ([www.logixml.com](http://www.logixml.com))**
