

# TECHNICAL INFORMATION

Dashboards, reporting, analysis and data integration – LogiXML gives you a unified platform and components that bring together all your company’s BI needs on a single, Web- and XML-based technology.

- **Easier to connect to diverse data sources** – LogiXML connects quickly to standard databases including Oracle, Microsoft SQL Server, MySQL, Sybase, CACHE, DB2, Informix, PostgreSQL, Access, ODBC/OLEDB/JDBC, and more plus Web services, Web Feeds, SaaS applications, and files such as Excel, CSV, XML and text

- **Platform and browser-independent** – you can deploy LogiXML solutions on both the .NET and the Java platforms as well as run them on all standard Web browsers including IE, Google Chrome, Firefox, Opera, Safari and mobile devices
- **Purely Web-based applications, no client software downloads needed** – LogiXML solutions are purely Web-based and do not require users to download client software, plug-ins or ActiveX

- **High-productivity development environment** – Our vast library of pre-built Logi elements allows developers to use their talent more efficiently, creating better reports quicker, increasing your productivity. Plug-in elements offer additional development extensibility
- **Virtually unlimited scalability** – The Logi hybrid reporting engine switches automatically from in-memory to file-system mode when extra scalability is needed – there’s no limit to LogiXML’s scalability except what your hardware can handle
- **Flexible, granular security** – LogiXML solutions offer authentication and authorization security features and let you control access to the report as well as to specific data within the reports, down to the row, column, and record level

*“We found Logi’s development process very efficient. From a developer’s perspective, LogiXML’s elemental design approach enables reusing of data objects, making report development quicker and more streamlined. As a result, we were quickly able to build our prototype, then move this into a production state to make available to our customers.”*
